EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Replace the previous claim 16 with the following claim 16

16. (previously presented): A method for detecting the concentration of exhaust gas using a NO_x sensor having first and second measurement chambers including associated first and second oxygen ion pump cells, respectively, which detects the concentration of NO_x in a gas discharged from an internal combustion engine, the method comprising:

detecting oxygen concentration in a gas introduced into the first measurement chamber of the NO_x sensor based on an electric current flowing through the first oxygen ion pump cell of the NO_x sensor;

calibrating a detection output of the gas sensor by determining a zero point, which indicates a zero concentration of NO_x, based on a detection output of the NO_x sensor when the detected oxygen concentration assumes a value substantially the same as that in atmosphere, and determining the NO_x concentration after the detection output has been calibrated.

The status identifier in claim 66 has been changed to "(previously presented)".

Art Unit: 1753

At the beginning of the specification after the term "1998" in the applicant's preliminary amendment to the specification on 2-6-2002, the phrase --now US Patent 6,375,828-- was inserted.

2. The above changes to claim 16 were made to merely change the status identifier and to remove the lined-through text, which if left in, would have been confusing to the printer because a previously presented claim should not have lined-through text. Because the above changes were not amendments to the claims themselves, approval for these changes from the applicant was not necessary.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kaj Olsen whose telephone number is (571) 272-1344. The examiner can normally be reached on Monday through Thursday from 5:30 A.M. to 3:00 P.M. and on alternate Fridays.
